## Compliance

Angra Limited recognises the importance of comprehensive compliance procedures to detect illicit criminals using our system. We are deeply committed to fighting money laundering and terrorism, and to fulfil this commitment, we at Angra Limited have adopted the following measures.

We train our staff on a regular basis on understanding and applying anti-money laundering laws and regulations. This training ensures that our staff team, as well as our agents, are fully aware of existing regulatory requirements and adopt best practices of anti-money laundering and terrorist financing guidelines. We have also developed an anti-money laundering manual that provides strict guidelines for our employees and independent agents in detecting potential money laundering and or any other activities that may be considered suspicious. We are implementing a Risk Based Approach to fight money laundering and terrorism finance.

Secondly, we subject our operations to independent compliance, audit, risk management and legal functions to evaluate our compliance with applicable anti-money laundering laws, rules, and regulations. We continuously strive to enhance our anti-money laundering policies and procedures to meet or exceed applicable laws and regulations and match international standards.
